

LEXINGTON GLOBAL WARMING ACTION COALITION
Citizens Taking Actions to Halt Global Warming

Home Energy Efficiency 101

a 3-part Series from Lexington Global Warming Action Coalition

All talks start at 7 PM

Cary Library Meeting Room • 1874 Mass. Ave., Lexington

■ **Thursday, January 29: "Home Energy Audits"** ■

■ **Tuesday, February 24: "Lower Your Electric Bills"** ■

■ **Monday, March 23: "Alternative Energy Installations"** ■

Admission is Free and Open to Everyone

LexGWAC Speaker Series

MOUNTAINTOP COAL MINING

Learn about the devastating environmental effects of this coal mining practice. The Mountaintop Removal Road Show is a traveling volunteer presentation that teaches people about the true costs of our nation's addiction to "cheap energy" from coal-fired power plants. Some of the most biologically diverse and productive temperate hardwood forests in the world are being eliminated by mountaintop removal coal mining. This presentation includes a 20-minute slide show about the impacts of mountaintop removal on coalfield residents, communities and the environment, and features traditional Appalachian mountain music and shocking aerial photos of decapitated Appalachian mountains.

Wed., March 18 • 7PM • Cary Library, 1874 Mass. Ave., Lexington
